1. SECTION HEADING

Main body text with an indent on the first line as specified in the Elsevier instructions.

1.1. Sub-section Heading

2. FIGURES

In Microsoft Word, when inserting or pasting pictures into the document, turn off the option to "Float over text". Allowing figures to float can cause problems when the document is opened on a computer with slightly different settings.

3. TWO-COLUMN FIGURES AND TABLES

To include a figure or table spanning the full-page width, first create a new section, formatted single column. The figure or table can then be incorporated into this new section. In Microsoft Word, creating an appropriate new section involves the following steps

Insert
Break
Sections Break, Continuous

Format
Columns
